

Enhanced Scrolling

Scrolling with the mouse wheel or trackpad now works everywhere in the builder. This includes scrolling through pages, folders, and while editing pages and widgets.

These updates are now available for all plans in the OnCell App Builder. You can check them out by signing up for a [free test drive](https://www.oncell.com/test-drive/) or [contacting us](https://www.oncell.com/contact/) to schedule a demo!
